Edited by instructors of anesthesia and critical care from Harvard Medical School and Massachusetts General Hospital, this comprehensive resource is an ideal study guide for critical care fellows, recertifying practitioners, and CCRNs.

Sat-9 Preparation and Practice Workbook Tae

The Project Management Answer Book

Berrett-Koehler Publishers If it's essential to project management... it's in here! The first edition of The Project Management Answer Book addressed all the key principles of project management that every project manager needs to know. With a new chapter on scrum agile, updates throughout, and many new PMP® test tips, this new edition builds on that solid foundation. The structure of this update maps closely to the PMBOK® Guide, Fifth Edition, and is designed to assist anyone studying for the PMP® and other certification exams. Helpful sections cover: • Networking and social media tips for PMs, including the best professional organizations, virtual groups, and podcast resources • The formulas PMs need to know, plus a template to help certification candidates prepare and self-test for their exams • Quick study sheet for the processes covered on the PMP® exam • Key changes in PMBOK® Guide, Fifth Edition, for readers familiar with earlier versions who want "the skinny" on the new version. PMs at every level will find real gold in the information nuggets provided in this new edition. Those new to project management will find the comprehensive coverage and the depth of the answers especially valuable, and will like the easy-to-read style and Q&A format. For experienced managers looking for new tools and skills to help them pass their PMP® or other certification exams, this is a must-have resource.

Rubber as a Construction Material for Corrosion Protection

A Comprehensive Guide for Process Equipment Designers

John Wiley & Sons First book on rubber used as a construction material dedicated to the chemical process industry. Despite the long history of rubber as a construction material, this book is a unique publication as it comprehensively looks at the material with respect to the anti-corrosion requirements of the multitude of industries where rubber is used, both on land and offshore. This guide documents how rubber reliably meets the threats of corrosion and contributes to the longevity of the equipment. Chapters on ebonite, natural, and synthetic rubbers, examine their relevant properties and chemical resistance. The book details the practical aspects and handling of rubber lined equipment: thin-walled structures, vacuum vessels, ducts, large diameter tanks, agitators, and fully lined pipes (both inside and outside). Molded and fabricated products of ebonite and soft rubber as well as hand-made rubber products are shown along with vulcanization technology, testing and inspections, measurements and standards. Several case studies are included demonstrating the preferential choice of rubber as a construction material as well as practical applications and techniques of its usage in the chlor-alkali, fertilizer, mineral processing and other core chemical processing industries, which are the largest consumers of rubber as a material of construction. The volume ends with a section on aging and prediction of service life. Rubber as a Construction Material for Corrosion Protection will be used by chemical engineers, rubber technologists, students, research workers worldwide in the rubber industry and process industries such as fertilizer, mining and ore, oil & gas, paper and pulp, steel plants, as well as people engaged in corrosion protection. The book will also be very useful to the construction industry.

Julian Robertson

A Tiger in the Land of Bulls and Bears

John Wiley & Sons Julian Robertson is one of the most successful and well-known hedge fund managers of our time. For nearly twenty years his infamous fund--Tiger Management--was the talk of the town, routinely delivering double-digit performance. This biography will explore this legendary fund manager's role in the development and popularity of hedge funds, examine his investment methodology and strategy, and look at the growth of his fund and his 'Tigers'--individuals who have gone on to great success themselves. * Includes candid interviews of Robertson, his colleagues, and his peers * Uncovers the trading strategies and investment style of a legendary fund manager * Offers a rare glimpse inside the personal world of Julian Robertson READERSHIP: Those with any interest in or knowledge of hedge funds, business readers, investment professionals. Daniel A. Strachman is Managing Director of Answers Company, a New York-based money management firm that offers investment management services to individuals and institutions. He has contributed many articles on investment management and strategies to publications including the New York Post and the Financial Times and is also the author of Getting Started in Hedge Funds (Wiley 2000). Also available by Daniel Strachman, Getting Started in Hedge Funds, 0471316962 Paper. EAN - 9780471323631 Carton Quantity - 41

Sex and Cognition

MIT Press Doreen Kimura provides an intelligible overview of what is known about the neural and hormonal bases of sex differences in behavior, particularly differences in cognitive ability. In this fact-driven book, Doreen Kimura provides an intelligible overview of what is known about the neural and hormonal bases of sex differences in behavior, particularly differences in cognitive ability. Kimura argues that women and men differ not only in physical attributes and reproductive function, but also in how they solve common problems. She offers evidence that the effects of sex hormones on brain organization occur so early in life that, from the start, the environment is acting on differently wired brains in girls and boys. She presents various behavioral, neurological, and endocrinological studies that shed light on the processes giving rise to these sex differences in the brain.

Financial Planning Answer Book 2009

CCH Covering the five key areas of financial planning, this guide emphasizes its technical, tax, and regulatory aspects. The areas of discussion include investments, employee benefits and retirement plan assets, insurance, income tax and estate planning, and regulatory issues.

Kaiparowits

Intellectual Property and Biodiversity

Rights to Animal Genetic Resources

Kluwer Law International B.V. Biotechnology is at the heart of heated debates about ethics, safety, economic development, and about the control over the biological materials and technologies used. The latter, grossly called biodiversity issues relating to the application of intellectual property, has been the subject of a wealth of literature. Yet, the situation of animal genetic resources specifically has only marginally been addressed so far. Many books and articles address 'biotechnology and agriculture', but have only plants and seeds in mind. Case-law and specific regulation is equally scarce. Exacerbated by the so-called 'erosion of animal genetic resources', climate change, the globalization of the market-place, and a strong concentration of markets, animal genetic resources however demand specific analysis and adjustments in intellectual property law. The decoupling of rights over animal genetic resources as an abstract concept, from those over the concrete animals is a fact today. The application of patents in this context became a full-fledged part of the management of animal genetic resources. This monograph analyzes against this background the impact of the patent system on ownership traditions in agriculture, on animal welfare, and on biodiversity. It looks at how those factors in turn are likely to affect the shape of patent law, and how they should affect it. The author hereby focuses on important specific issues arising, including the following: the underlying elements deciding on the shape of regulation - innovation, economic development, agriculture, human rights, animal welfare, the conservation of resources, and equal trading conditions; the continuing applicability of trademarks, geographical indications, copyright, and trade secrets; patentability rules and exclusions; the extension of patent rights over progeny; the meaning of 'essentially biotechnological processes'; the legal definitions of 'morality' and 'ordre public' in the context of animal welfare; and the future of international patent law in the context of global governance theories. With detailed investigation of how three major jurisdictions - the European Union, the United States, and Canada - have regulated the matter, the book highlights unresolved issues in the laws dealing with animal genetic resources. How do the usual principles of patent law affect ownership over animals in agriculture? To what extent is patent law in accordance with neighbouring fields of regulation, with relation to animal welfare? How can intellectual property be used to alter, stimulate, or tackle developments in the realm of the conservation and promotion of biodiversity? Questions like these are asked, checked upon the more technical country studies; and then used to put to test the adequacy of international patent regulation in a final chapter. As a deeply informed overview of the arguments and discussion points, this is the only book of its kind. It links general discussions to the often technical and complicated patent regulations, in the specific context of animal genetic resources. It is sure to bring lawyers in the field closer to the policy debates; and decision makers closer to the precise idiosyncrasies of patent law.

Acute Care Oncology Nursing E-Book

Elsevier Health Sciences As the likely first responder in an emergency, you need quick access to essential information on the potential complications of many different cancer types and treatments. The new edition of this trusted resource provides up-to-date information on the pathophysiology, complications, risks, treatment approaches, prognosis, assessment findings, and nursing and medical interventions for a wide range of cancers. It also offers valuable information to help you fulfill your role as care coordinator and patient advocate, including client education guidelines, discharge procedures, and strategies for helping the client and family deal with the impact of the disease's progression. A consistent format throughout helps you quickly find the information you need, no matter what the topic. This indispensable reference is written and reviewed by both oncology and acute care

nurses, ensuring accuracy, currency, and clinical relevance. Coverage of each cancer includes pathophysiologic mechanisms, epidemiology and etiology, risk profile, prognosis, professional assessment criteria (PAC), nursing care and treatment, evidence-based practice update, patient teaching, nursing diagnoses or DSM-IV, evaluation and desired outcomes, and discharge planning with follow-up care, where needed. The latest prognosis statistics give you a realistic picture of the survival possibilities for your patients so you can provide the most appropriate nursing care and patient education. Multiple-choice review questions with answers and rationales at the end of each chapter help reinforce your understanding of key concepts and prepare you for certification examinations. Special boxes highlight pediatric-specific care considerations for working with children. Six new chapters — Biliary and Pancreatic Obstruction, Depression and Cognitive Dysfunction, Dyspnea and Airway Obstruction, GI Obstruction, Heart Failure, and Spiritual Distress — keep you up to date with the latest advances in oncology nursing. Evidence-based rationales in the nursing interventions help you apply the latest research findings to actual practice. Each chapter includes a new section on pathophysiology to help you understand the physiologic processes associated with each oncologic complication.
