Your Guide to Lowering Your Blood Pressure with Dash

Dash Eating Plan

Createspace Independent Publishing Platform **This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.**

A Kidnapped Mind

A Mother's Heartbreaking Memoir of Parental Alienation

Dundurn How do we begin to describe our love for our children? Pamela Richardson shows us with her passionate memoir of life with and without her estranged son, Dash. From age five Dash suffered Parental Alienation Syndrome at the hands of his father. Indoctrinated to believe his mother had abandoned him, after years of monitored phone calls and impeded access eight-year-old Dash decided he didn't want to be "forced" to visit her at all; later he told her he would never see her again if she took the case to court. But he didn't count on his indefatigable mother's fierce love. For eight more years Pamela battled Dash's father, the legal system, their psychologist, the school system, and Dash himself to try and protect her son - first from his father, then from himself. A Kidnapped Mind is a heartrending and mesmerizing story of a Canadian mother's exile from and reunion with her child, through grief and beyond, to peace.

Farewell to Model T

From Sea to Shining Sea

New York Review of Books In 1922, just out of college and at loose ends, E.B. White set off across America in a Model T. He left his map at home, but packed his typewriter— his true destination, he tells us, was the world of letters. White wrote the richly humorous "Farewell to Model T" for *The New Yorker* in 1936; it was the first of his essays to bring him fame. In "From Sea to Shining Sea," White conjures the unspoiled America that remained his most enduring subject. The first essay of E. B. White's to become famous, "Farewell to Model T" originally appeared in 1936 in *The New Yorker* as "Farewell My Lovely." It is rich in comic descriptions of the eccentricities of the car, the demands it put on its devoted owners, and the hardware and decorative accessories—from 98-cent anti-rattlers to the "de-luxe flower vase of the cut-glass anti-splash type"—that kept them pouring over the Sears Roebuck catalog. If there was an owner's manual for the flivver, it didn't begin to divulge what the owner needed to know. That's where theory, speculation, superstition, and metaphysics came in: "I remember once spitting into a timer," White recalls, "not in anger, but in a spirit of research." It is published for the first time with "Sea to Shining Sea," in which White conjures the America that he had discovered as a 22-year old during a cross country trip in his Model T. (The year was 1922, the same the year that Fitzgerald and Hemingway went to Paris to find themselves.) In it he would write: "My own vision of the land—my own discovery of it—was shaped, more than by any other instrument, by a Model T Ford...a slow-motion roadster of miraculous design—strong, tremulous, and tireless, from sea to shining sea."
