Language Case Files in Neurological Disorders *Routledge* This book features case studies of ten individuals with acquired neurological disorders. These disorders have implications for speech, language, and communication, but to date they have not been the focus of research in speech-language pathology. Chapters present a brief medical overview of each condition, followed by detailed linguistic analysis. A carefully assembled narrative captures the impact of each neurological disorder on an individual's daily life and social activities. This structured approach, supported by further reading and exercises, gives readers a nuanced understanding of each disorder's clinical presentation and language and communication features, and the complex interrelationship between language, communication, and cognitive and motor symptoms. The book will be of interest to students of all levels, researchers, and clinicians in speech-language pathology and related disciplines, including neurology, psychiatry, and psychology. Evangelist Marketing What Apple, Amazon, and Netflix Understand About Their Customers (That Your Company Probably Doesn't) *BenBella Books, Inc.* In Evangelist Marketing, Alex Goldfayn argues that technology companies succeed in spite of their marketing, not because of it. He says that if consumer tech makers ceased all marketing activity today, they would not see a significant decline in sales. In this book, Alex presents why the current state of overly-technical, features-oriented tech marketing, branding, communications and public relations is costing the industry billions of dollars—easy money that's voluntarily being left on the table. Then he lays out a step-by-step system for creating intensely loyal brand evangelists based on deep consumer insights and simple, emotional language. Evangelist Marketing is written for consumer tech companies big and small—from PC manufacturers to Web-based services. It's also sure to improve the work of their marketing and public relations agencies.
