IMAGES OF POSTMODERN SOCIETY

SOCIAL THEORY AND CONTEMPORARY CINEMA

SAGE **By using a series of studies of contemporary mainstream Hollywood movies - "Blue Velvet, Wall Street, Crimes and Misdemeanors, When Harry Met Sally, Sex Lies and Videotape, Do the Right Thing "- Norman Denzin explores the tension between ideas of the postmodern, and traditional ways of analyzing society. The discussion moves between two forms of text: social theory and cinematic representations of contemporary life. Denzin analyzes the ideas of society embedded in poststructuralism, postmodernism, feminism, cultural studies and Marxism through the ideas of key theorists like Baudrillard, Barthes, Habermas, Jameson, Bourdieu and Derrida. He relates these to the problematic of the postmodern self as exposed in cinema centering on the decisive performance of race, gender and class.**

MEDICAL ANTHROPOLOGY

A BIOCULTURAL APPROACH

Oxford University Press, USA Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

ADVANCED LINUX PROGRAMMING

Sams Publishing This is the eBook version of the printed book. If the print book includes a CD-ROM, this content is not included within the eBook version. Advanced Linux Programming is divided into two parts. The first covers generic UNIX system services, but with a particular eye towards Linux specific information. This portion of the book will be of use even to advanced programmers who have worked with other Linux systems since it will cover Linux specific details and differences. For programmers without UNIX experience, it will be even more valuable. The second section covers material that is entirely Linux specific. These are truly advanced topics, and are the techniques that the gurus use to build great applications. While this book will focus mostly on the Application Programming Interface (API) provided by the Linux kernel and the C library, a preliminary introduction to the development tools available will allow all who purchase the book to make immediate use of Linux.

LATIN AMERICAN DENDROECOLOGY

COMBINING TREE-RING SCIENCES AND ECOLOGY IN A MEGADIVERSE TERRITORY

[Springer Nature](#) Latin America is a megadiverse territory hosting several hotspots of plant diversity and many types of forest biomes, ecosystems and climate types, from tropical rainforest to semi-arid woodlands. This combination of diverse forests and climates generates multiple responses to ecological changes affecting the structure and functioning of forest ecosystems. Recently, there have been major efforts to improve our understanding of such impacts on ecosystems processes. However, there is a dearth of studies focused on Latin-American forest ecosystems that could provide novel insights into the patterns and mechanisms of ecological processes in response to environmental stress. The abundance of “New World” tree species with dendrochronological potential constitutes an ideal opportunity to improve the ecological state of knowledge regarding these diverse forest types, which are often threatened by several impacts such as logging or conversion to agricultural lands. Thus, detailed information on the dendroecology of these species will improve our understanding of forests in the face of global change. Accordingly, this book identifies numerous relevant ecological processes and scales, ranging from tree species to populations and communities, and from both dendrochronological and dendroecological perspectives. It offers a valuable reference guide for the exploration of long-term ecological interactions between trees and their environmental conditions, and will foster further research and international projects on the continent and elsewhere.

SURVIVING RELIGIOUS BURNOUT

GET OUT OF YOUR SPIRITUAL RUT AND START ENJOYING A MEANINGFUL CHRISTIANITY

Have you ever experienced burn out as a believer? What do you do when your faith feels stuck in a rut? While some focus on being more disciplined, there is another solution. Christianity is not about perfecting your spiritual routines. Freedom in Christ should lead to our souls being released, not restricted. How do we access a Christian walk that is refreshing and full of joy when we have become used to experiencing something less rewarding? Most well-meaning believers are unaware they have slipped into legalism. Further complicating this Christian performance trap is that you appear passionate and excited all the up to burning out. You can only run on this spiritual treadmill for so long before you realize you are going nowhere. The frustration of always moving but never arriving is enough to cause anyone to become discouraged and give up. In *Surviving Religious Burnout*, I hope to help you escape this pattern of exhaustion. This book will help you get out of your spiritual rut and into an enjoyable, meaningful Christianity. To do this, we will dig up the roots of burnout and plant seeds of truth that will lead to a flourishing faith.
