Billy wanted the family and load hauling capabilities of a full sized truck without the horrible fuel economy or the excessive price. As an engineer, he understood the efficiency and torque that turbodiesel engines provide. He knew that his goals were achievable if the right decisions were made. So, he decided to build a practical hauler for his family that wouldn't break the bank. He started with an unusual host for an efficiency project: a large, heavy, brick-shaped 1999 Suburban. He integrated a 3.9 liter Isuzu turbodiesel engine and a five-speed manual transmission into this vehicle, creating a cavernous family conveyance that cruises at highway speeds while achieving 26 mpg. The Suburban retains functional four wheel drive, cruise control, and air conditioning. Because a mechanically-injected engine and a manual transmission were used, the drivetrain of the vehicle is EMP-proof. With a 40 gallon fuel tank, the vehicle can achieve a range of over 1000 miles without refueling. This book describes the author's decision-making process as he chose, modified, and installed the components in his conversion process. He shares a number of lessons he learned the hard way, in the hopes that sharing his experience will make it easier for others to pursue similar projects. **Bittersweet Lies** Every lie casts a dark shadow on your soul ... Some countries are still emerging from the era of cold war politics, while debilitating internal struggles continue to plague others. Ethiopia, Namibia, South Africa, Uganda, and more recently, Angola and Mozambique are examples of the former. The latter is illustrated by the situation in countries such as Liberia, Somalia and the Sudan. This study, the transition from war to peace in Sub-Saharan Africa, offers practical guidance and examples of good practice for improving the design and implementation of programs for demobilization, reinsertion, and reintegration of ex-combatants and their dependents in client countries. It also provides a list of early warning signals that indicate whether the demobilization and reintegration programs (DRPs) process is not going according to plan and suggests preventive actions. Work on the ground, as well as case analysis in countries such as Ethiopia, Namibia, Uganda, Angola, Mozambique, and Rwanda form the basis of the suggested good practice in DRPs. **The Women of the American Revolution Introduction to Radar Using Python and MATLAB** Artech House This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems.
