Recently, organic solar cells have gained extensive attention as a next-generation photovoltaic technology due to their light weight, mechanical flexibility, and solution-based cost-effective processing. Organic Solar Cells: Materials, Devices, Interfaces, and Modeling provides an in-depth understanding of the current state of the art of organic solar cell technology. Encompassing the full spectrum of organic solar cell materials, modeling and simulation, and device physics and engineering, this comprehensive text: Discusses active layer, interfacial, and transparent electrode materials Explains how to relate synthesis parameters to morphology of the photoactive layer using molecular dynamics simulations Offers insight into coupling morphology and interfaces with charge transport in organic solar cells Explores photoexcited carrier dynamics, defect states, interface engineering, and nanophase separation Covers inorganic-organic hybrids, tandem structure, and graphene-based polymer solar cells Organic Solar Cells: Materials, Devices, Interfaces, and Modeling makes an ideal reference for scientists and engineers as well as researchers and students entering the field from broad disciplines including chemistry, material science and engineering, physics, nanotechnology, nanoscience, and electrical engineering.*

VEHICLE-DEPENDENT EXPEDITION GUIDE

GRAVE MURDER

THE STORY BEHIND THE BRUTAL WELKOM KILLING

Penguin Random House South Africa *She is a petite, innocent-looking young woman with fantasies of skinning and flaying human skin. He is a diagnosed schizophrenic who fantasises about committing cold-blooded murder. When they meet, they will plan and execute one of the most horrific crimes ever documented in this country. In April 2011, the sleepy gold-mining town of Welkom was deeply shocked when the dismembered, decapitated body of Michael van Eck was discovered buried in a shallow grave on the outskirts of the local cemetery. Was this a muti murder, the work of a deranged madman or part of a satanic ritual? For the investigators and psychologists involved, the mystery only deepened when a seemingly unlikely arrest was made: a soft-spoken girl next door and her intelligent, devoted fiancé. Joining forces with some of the country's most specialised experts in the occult and psychopathy, Lieutenant Ogies Nel of the Welkom Detective Unit and her colleagues in the South African Police Service unravelled one of the most brutal psychologically motivated murders ever committed in South Africa's crime history. As they uncovered the evidence, they exposed a most heinous deed, alarmingly similar to the crimes committed by serial killer Ed Gein, who had a preference for flaying his victims' skin. Grave Murder is the chilling account of how appearances can be very deceptive – how those who might seem innocent and harmless on the outside may hide some dark, disturbing secrets that are just waiting to be revealed.*

ELECTRONIC PROJECTS FOR THE RASPBERRY PI

BOOK 2 - INTERFACING TO ANALOGUE SIGNALS

Createspace Independent Publishing Platform *Reading analogue signals is very useful in a multitude of applications. For example many sensors output an analogue signal that is proportional to the stimuli being measured like temperature, light, pressure and sound level. The Raspberry Pi GPIO does not have any Analogue to Digital Converters (ADC) to allow this to be measured directly. The projects in this book are all about using an external ADC and then interfacing to a number of sensors to make measurements. Project 1 - Measuring Voltage Project 2 - Temperature Measurement Using the TMP36 Project 3 - Resistance Measurement Project 4 - Measuring Temperature Using a Thermistor Project 5 - Measuring Light Level Using a Light Dependent Resistor Project 6 - Measuring Force Using a Force Sensing Resistor Project 7 - Measuring Voltage of a Car Battery Project 8 - Measuring Low Voltages Project 9 - Measuring Power Using a Current Clamp Project 10 - Measuring Sound Level Using a Microphone*

TORN TROUSERS: A TRUE STORY OF COURAGE AND ADVENTURE: HOW A COUPLE SACRIFICED EVERYTHING TO ESCAPE TO PARADISE

4xOverland *What could possibly go wrong in paradise? Tired of mortgage payments, thirty-something Andrew and Gwynn sold nearly everything they owned but their Siamese cat and escaped their humdrum nine-to-five existence for life in paradise—a tiny island in one of the remotest spots on Earth: the Okavango Delta in Botswana. Woefully inexperienced, they took control of a luxury game lodge that catered to the likes of French aristocrats, Hollywood directors, Mafia lawyers, and the captain of the England cricket team. Not forgetting the hippos who liked to crash cocktail hour. Trouble soon followed as the reality of running a hotel on an island accessible only by boat or plane burst upon them. Andrew and Gwynn learned it's one thing for guests to wake up with gentle giraffes outside their windows, but it's quite another to keep them safe from poisonous snakes, temperamental elephants, and a hyena with a taste for plastic. All that was child's play compared to figuring out how to feed their guests when a 'quick run' to the grocery store required a plane, a bush pilot, and moderate risk to life, limb, and property. By turns funny, touching, and suspenseful, Torn Trousers is a real modern fairytale about getting exactly what you wished for...and then having to live with it. Scroll up and buy to escape to Africa today!*
