AFRICA OVERLAND

Bradt Travel Guides *Be vigilant when driving through Africa: camels are careless when crossing the road, and women carrying waterpots are little more watchful. So warn the authors of this fifth edition of Africa Overland. They also give updated information on each country's political and security situation (Angola, Sierra Leone and Liberia are on the up; since this guide's last edition, security in Western Sudan and Eastern Chad has turned sour); provide an expanded Route Outlines section including information on border crossings; and offer revised recommendations on vehicles including practical coverage on buying a vehicle, maintenance and driving. 'This is the ultimate roadies' guide to traversing the wilderness of Africa. An indispensable guide to negotiating the uncharted perils of Africa's vast plains.'* Daily Express (UK)

WHITE MAN WALKING

Mwanaka Media and Publishing Pvt Ltd *These short stories by Zimbabwean poet and novelist, John Eppel, are not for the politically correct. Eppel should have listened to the wise words of Enobarbus in Shakespeare's Antony and Cleopatra: 'That the truth should be silent, I had almost forgot'. But, once a fool, always a fool. In White Man Walking, you will find semi-fictionalised accounts of greed, cruelty, and corruption; idiocy, naivety, and irresponsibility. Oh, and there are occasional moments of tenderness!*

TOGETHER

STORIES AND POEMS

African Books Collective *THE TWO ZIMBABWEAN WRITERS* featured in this collection of stories and poems could not be more different. John Eppel is an English literature teacher in Bulawayo; Julius Chingono, from Norton, near Harare, was a rock-blaster in mines for many years. Eppel is a deliberate stylist, while Chingono is a deliberate anti-stylist. The western literary tradition is pervasive in Eppel's writing; Chingono is his own tradition. In another sense, however, they could not be more similar. Both share an aversion for those in power who exploit it to the detriment of all but their cronies and themselves; both feel a deep compassion for the poor and the marginalized of Zimbabwe. And they are both very funny.

PRE-INCIDENT INDICATORS OF TERRORIST INCIDENTS

THE IDENTIFICATION OF BEHAVIORAL, GEOGRAPHIC AND TEMPORAL PATTERNS OF PREPARATORY CONDUCT

DIANE Publishing *This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.*

TORN TROUSERS: A TRUE STORY OF COURAGE AND ADVENTURE: HOW A COUPLE SACRIFICED EVERYTHING TO ESCAPE TO PARADISE

4xOverland *What could possibly go wrong in paradise? Tired of mortgage payments, thirty-something Andrew and Gwynn sold nearly everything they owned but their Siamese cat and escaped their humdrum nine-to-five existence for life in paradise—a tiny island in one of the remotest spots on Earth: the Okavango Delta in Botswana. Woefully inexperienced, they took control of a luxury game lodge that catered to the likes of French aristocrats, Hollywood directors, Mafia lawyers, and the captain of the England cricket team. Not forgetting the hippos who liked to crash cocktail hour. Trouble soon followed as the reality of running a hotel on an island accessible only by boat or plane burst upon them. Andrew and Gwynn learned it's one thing for guests to wake up with gentle giraffes outside their windows, but it's quite another to keep them safe from poisonous snakes, temperamental elephants, and a hyena with a taste for plastic. All that was child's play compared to figuring out how to feed their guests when a 'quick run' to the grocery store required a plane, a bush pilot, and moderate risk to life, limb, and property. By turns funny, touching, and suspenseful, Torn Trousers is a real modern fairytale about getting exactly what you wished for...and then having to live with it. Scroll up and buy to escape to Africa today!*

PANDEMICS

WHAT EVERYONE NEEDS TO KNOW®

Oxford University Press *Pandemics. The word conjures up images of horrific diseases sweeping the globe and killing everyone in their path. But such highly lethal illnesses almost never create pandemics. The reality is deadly serious but far more subtle. In Pandemics: What Everyone Needs to Know®, Peter Doherty, who won the Nobel Prize for his work on how the immune system recognizes virus-infected cells, offers an essential guide to one of the truly life-or-death issues of our age. In concise, question-and-*

answer format, he explains the causes of pandemics, how they can be counteracted with vaccines and drugs, and how we can better prepare for them in the future. Doherty notes that the term "pandemic" refers not to a disease's severity but to its ability to spread rapidly over a wide geographical area. Extremely lethal pathogens are usually quickly identified and confined. Nevertheless, the rise of high-speed transportation networks and the globalization of trade and travel have radically accelerated the spread of diseases. A traveler from Africa arrived in New York in 1999 carrying the West Nile virus; one mosquito bite later, it was loose in the ecosystem. Doherty explains how the main threat of a pandemic comes from respiratory viruses, such as influenza and SARS, which disseminate with incredible speed through air travel. The climate disruptions of global warming, rising population density, and growing antibiotic resistance all complicate efforts to control pandemics. But Doherty stresses that pandemics can be fought effectively. Often simple health practices, especially in hospitals, can help enormously. And research into the animal reservoirs of pathogens, from SARS in bats to HIV in chimpanzees, show promise for our prevention efforts. Calm, clear, and authoritative, Peter Doherty's Pandemics is one of the most critically important additions to the What Everyone Needs to Know® series. What Everyone Needs to Know® is a registered trademark of Oxford University Press.
