#### PROCEEDINGS OF THE APPLIED LINGUISTICS AND LANGUAGE TEACHING CONFERENCE (ALLT) 2018: TEACHING AND LEARNING IN A GLOBALISED WORLD

---

Zayed University Press Edited by: Wafa Zoghbor, Suhair Al Alami, & Thomaï Alexiou This volume contains a selection of eighteen articles that originated as papers presented at the Applied Linguistics and Language Teaching International Conference and Exhibition (ALLT 2018), which was held at Zayed University, Dubai, United Arab Emirates, in March 2018. The articles selected for inclusion showcase high quality contributions that document theory, research, and pedagogy within the field of Applied Linguistics and language teaching in the Arab Gulf and beyond. The articles are grouped into the following five broad sections: • Teaching of Writing Skills • Professional Development • Young Learners • Teaching, Learning, and Pedagogy • Language Teaching and Attitude The articles included in this volume represent the diverse background, experiences, and research interests of the ALLT presenters. The contributions are a mix of theoretical, empirical and pedagogical practices with a strong emphasis on English language use and function along with language teaching. This makes the Proceedings of the Applied Linguistics and Language Teaching (ALLT 2018) Conference an invaluable resource, addressing important aspects of contemporary research topics and lesson plans on language teaching.

#### HUMANISTS VERSUS ENGINEERS IN URBAN POLICY AND PROFESSIONAL EDUCATION

---

Springer Science & Business Media Mobility and Environment calls for a mobility revolution which does not simply mean taking a bus instead of a car: it implies a dramatic shift in the political debate from a technical to a political culture. The author introduces his book by disputing "non-political" Sustainable Development policies which are among the major culprits for the conservatism in environmental policies. For at least forty years, urban mobility policies, based on compulsive infrastructure building, have failed both in satisfying transportation demand and in coping with high environmental impacts. Nonetheless decision-makers keep employing the same professionals and therefore they act as shepherds who commit their sheep in the wolf's custody. Corrado Poli treats mobility policy as a political, ethical, social and educational issue rather than as a mere civil engineering one. Mobility and Environment challenges some deeply entrenched professional and economic monopolies which negatively affect urban and transportation planning in North America and Europe, and argues the old idea which bounded transportation and communication. A real environmentalist effort in traffic planning should begin from new technologies and from the analysis of citizens preferences. A series of new projects are presented which include mobility demand reduction and focus on democracy in planning.

**IELTS WRITING BAND 8 ESSAYS - A GUIDE TO WRITING HIGH QUALITY IELTS ESSAYS**

Lulu Press, Inc There are three main types of essay questions that are included in the IELTS writing exam. It is important to learn how to structure each of these types. Each of these will be described more fully in the sections that follow. Briefly, they are an opinion essay, where you are asked to give your own personal opinion on a topic; a both sides and opinion essay, where you are required to discuss both sides of an argument and then give your own personal opinion on the topic; and a two question essay, which involves responding to two different questions.

**AIR TRAFFIC AND AIRPORT CONGESTION****SELECTED REFERENCES****INTELLIGENT INFRASTRUCTURE****ZIP CARS, INVISIBLE NETWORKS, AND URBAN TRANSFORMATION**

University of Virginia Press While many of its traditional elements, such as roads and utilities, do not change, urban infrastructure is undergoing a fascinating and necessary transformation in the wake of new information and communication technologies. This volume brings together many of the most important new voices in the fields impacting modern urban infrastructure to explore this revolutionary change in the city. Increasingly, it is connective systems rather than built forms that bind a city together. Intelligent infrastructure confers upon a city previously unimagined levels of adaptability, with mobile telephony serving to organize people and events on the move and in real time. Beginning with a consideration of invisible networks—the sociohistorical systems that contribute to and constitute urbanity—the essays collected here examine a variety of actual tools, from handheld devices to autonomous vehicles, within a fully networked built environment: the smart city. This book argues that knowledge of both the visible and invisible components—information, energy, sustainability, transportation, housing, and social practices—are critical to understanding the urban environment. The dynamic and diverse cast of contributors includes Mitchell Schwarzer, Frederic Stout, Anthony Townsend, Carlo Ratti of the MIT SENSEable City Lab, Mitchell Joachim of Terreform ONE, and many other innovators who are changing the urban landscape.

**WRITER'S SOLUTION****GRADE 11****THE FUTURE OF DISABILITY IN AMERICA**

National Academies Press The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. *The Future of Disability in America* is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

**COMPARISON OF TRAFFIC PLANNING IN SWEDISH LAND USE PLANS**

---

---

GRIN Verlag Seminar paper from the year 2006 in the subject Geography / Earth Science - Demographics, Urban Management, Planning, grade: 2, Uppsala University, course: Politische Geographie und "Gesellschafts"-planung, 19 entries in the bibliography, language: English, abstract: This essay compares different preparatory land-use plans from Uppsala län and Stockholm län in Sweden concerning topics of their traffic planning. The reason for the selection of plans from these two regions is firstly the limited possibility to compare bigger numbers of plans in this short essay and secondly the spatial nearness of them. But what is the reason to compare the traffic planning anyway? The population development, the load of the road net, the changing usage of vehicles of all kind, the traffic safety, rising energy prices, economical and environmental questions and the purpose of municipalities and the state to offer their citizens a proper possibility of mobility are only a few reasons to perform a balanced, long-sighted and sustainable planning. The main emphasis of this essay is to check if different municipalities aspire after solutions for a decreasing car use, environmental friendly concepts and how they want to regulate their objectives. Of course is such a comparison not very easy to perform, because of the different size and preconditions of the municipalities and the age of their preparatory land-use plan. The essay will at first introduce into the problem, different planning tools and the preconditions in the region, and then it will continue with a short summary of the traffic planning in each chosen land-use plan and will after that compare some main issues within the plans followed by conclusion of the results.
