I Hike

Mostly True Stories from 10,000 Miles of Hiking

“I never set out to hike 10,000 miles. It just sort of happened over the course of a decade.” And so goes Lawton Grinter’s compelling collection of short stories that have been over ten years and 10,000 trail miles in the making. I Hike brings the reader trailside with blissful moments on the highest mountain ridges to the mental lows of mosquito hell and into some peculiar situations that even seasoned hikers may find unbelievable. Between jobs and in search of something more, Lawton Grinter spent the better part of a decade hiking America’s longest trails. In doing so he came face to face with things that go bump in the night, the kindness of strangers, a close encounter with hypothermia and the absurd rights of passage common to the eccentric people that call themselves long-distance hikers. Anyone who’s ever stepped off the pavement will appreciate these humorous and sometimes agonizing accounts of trail life. I Hike will make you laugh, cry, cringe and leave you wanting to read more!

The U.S. Army/Marine Corps

Counterinsurgency Field Manual

University of Chicago Press **When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S.**

military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, *The U.S. Army / Marine Corps Counterinsurgency Field Manual* will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. The Forgotten Unit of Iwo Jima

386th Asg, Usaaf.

CreateSpace It was the first and only time during combat operations in the Pacific theater that an Army Air Force unit would land with U.S. Marine assault elements across a hostile beach. The date was February 24, 1945 (D+5), and the beach on which the men of the 386th Air Service Group (ASG), U.S. Army Air Force (USAAF) landed was given the name of a color - Red. They possessed few of the combat skills Marine infantrymen would have had. They weren't trained to close with and destroy an enemy through close combat. They were specialists, trained in skills totally alien to the Marine "grunts" swarming ashore. Their skills, however, were critical to the successful execution and completion of Operation Detachment (code name for the island and battle destined to become legendary in the history of World War II). Red beach was one of the black sand beaches on the eastern shore of the island named - Iwo Jima. This is a brief history of the 386th ASG, USAAF. Their story could have been lost to history except for the tenacity of a few of the units veterans and their descendants. It's the account of a group of men who could accomplish almost anything asked of them. They worked 24/7 for months, without complaint, in an environment fraught with danger and instant death. They were part of a generation of Americans whose self-sacrifice, courage, and love of country set them apart from every other generation. These men were members of the generation that saved civilization as we know it, "The Greatest Generation," and they are nearly all gone now. Fortunately, their story survives and should serve as an inspiration to those generations of Americans who follow after them.
