Lifting the Scientific Veil

Science Appreciation for the Nonscientist

Rowman & Littlefield *Lifting the Scientific Veil* has been written to afford the nonscience student the same meaningful opportunity to explore germane scientific topics as is generally given the science student to learn about the humanities and social sciences. Since nonscientists are generally responsible for making laws, financing research, or, at the very least, for voting, it is essential that they understand the significant impact that science has on everyday life. The book is designed to introduce nonscientists in an informative and comprehensible manner to four of the most significant scientific theories of the twentieth century: the big bang, quantum physics, relativity, and evolution. After each theory is explained informally, the book shows how that theory and related technology impact upon one's personal life. Legal and political aspects of these theories are explored as well as philosophical and theological implications.

Managerial Economics

Foundations of Business Analysis and Strategy

McGraw-Hill Education The goal of Thomas and Maurice's *Managerial Economics* is to teach students the economic way of thinking about business decision and strategy. This edition continues to develop critical thinking skills and provides students with a logical way of analysing both the routine decisions of managing the daily operations of a business as well as the longer-run strategic plans that seek to manipulate the actions and reactions of rival firms. *Managerial Economics* is a self-contained textbook that requires no previous training in economics. While maintaining a rigorous style, this book is designed to be one of the most accessible books in managerial economics from which to teach and learn because of its clarity of presentation and strong end of chapter problems. Rather than parading students quickly through every interesting or new topic in microeconomics and industrial organization, this 11th edition instead carefully develops and applies the most useful concepts for business decision making and strategic planning.
