Trunking Scanners for Beginners

Using FreeSCAN and the Uniden TrunkTracker

"I think we need a new crystal for this thing." --Scanner guy from the 70s Scanners were a lot simpler in decades past, when everything was analog, had a fixed frequency, and was unencrypted. Nowadays, we have those old analog stations as well as digital, trunking systems, protocols, sites, talk groups, and who-knows-what coming down the road for next year. There are a lot of frequencies, systems, groups, codes, and little nit-picky details that have to go into our radios before we can even pick up a single call. On the other hand, radios continue to get more and more powerful, and unfortunately, more complicated to handle all the new options. This doesn't make programming them any easier. Fortunately, we have computers to handle all the programming stuff for us. Just hook the radio up to the computer, find your location on a website, transfer the frequency and channel data into the radio, and you're good to go. Sounds simple, doesn't it? If you've tried to program a digital trunking system, you know how complicated these things can get, and just how unhelpful the manuals can be. Wouldn't it be nice to just have someone go through the process and just "get the damned thing working" without all the theory? Fortunately, there are a combination of tools that you need to master to even begin. FreeSCAN is free software that works with a large number of common scanners and works for both analog and digital systems. FreeSCAN even has tools to import and set up all the frequencies automatically. If you're already comfortable programming digital trunked systems through the number pad, or have no trouble working with whatever software came with your radio, then maybe this book isn't for you. If you aren't good with computers, or you're having trouble with the basic process, don't know the difference between a talk group, site, and system, or are

otherwise pulling your hair out trying to get your radio programmed, then this book is for you! We'll walk through getting the software installed and set up, connecting your radio with an appropriate cable and communications port, reading data from the radio, downloading and fine-tuning new frequency data, setting quick keys and locking out extraneous frequencies, and writing that data back out to the radio.

Radar Instruction Manual

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. How to Be Invisible

A Step-By-Step Guide To Protecting Your Assets, Your Identity, And Your Life

Thomas Dunne Books For most of us, privacy means an unlisted telephone number. But what about your Social Security number? Your credit card numbers? Your bank account statements? Your personal health data? You may think this information is also secure, but if you've ever ordered anything over the Internet, or if your credit card is on file at the local video store just in case you never return that copy of Titanic, or if you throw out bank statements without shredding them, then this information is now in the public domain and can easily be discovered and used against you by a private eye, a computer hacker, or even a vengeful neighbor or former lover. Once people gain control of even a shred of your personal information, they can gain control of your life. They can transform this information into access to your assets, your loved ones, even your identity. And once your privacy is gone, there's very little you can do to get it back. J. J. Luna, a highly trained and experienced security consultant, can show you how to achieve the privacy you crave, whether you just want to shield yourself from casual scrutiny or take your life savings and disappear without a trace. He reveals the shocking secrets that private detectives use to uncover information, and then shows you how to safeguard against them. Filled with vivid real-life stories drawn from the headlines and from Luna's own consulting experience, *How to Be Invisible* is the essential guide to preserving your personal security. Privacy is commonly lamented as the first casualty of the Information Age-- but that doesn't mean you have to stand for it.

Checklists for Sailors - Passage Planning, Sailboat Maintenance, Cleaning, Medical and More

Making it Easier to Enjoy Sailing Your Sailboat

After my husband and I decided to sell everything we own, buy a sailboat and sail around the world we were overwhelmed by the enormous learning curve. Sailing our new sailboat was one part of the equation but what really baffled us, at the start, were the hundreds of maintenance tasks and cleaning routines. Almost six years after we started, we've learned an incredible amount about sailing, passage planning, anchoring, taking guests aboard, servicing and maintaining our systems (engine, generator, pumps, batteries, and on), cleaning schedules, provisioning, medical concerns and even how to entertain young children on board. This book has therefore been created as a guide, or a blueprint, to help you mitigate your learning curve regarding a variety of standard tasks associated with sailing a sailboat. Here are just some of the checklists you'll find in this helpful resource for sailors or skippers: - The start to finish of a sailing voyage with new crew/guests- Passage planning - preparation and plan- Boat briefing-Guests and or crew duties and responsibilities- Anchoring- Packing and preparing for a sailing holiday- Maintenance and service checks- Wintering a boat- Every time your boat is out of the water- Spare parts checklist- Cleaning and maintenance checklists- The First Aid log- The First Aid Kits- Medical question form- Medical radio advice forms- Medical observation checklists- Taking the dingy to land- Keeping children occupied on a boat- What about Seasickness?- Meal provisioning.All those and more. How to Be Invisible

The Essential Guide to Protecting Your Personal Privacy, Your Assets, and Your Life

Thomas Dunne Books From cyberspace to crawl spaces, new innovations in information gathering have left the private life of the average person open to scrutiny, and worse, exploitation. In this thoroughly revised update of his immensely popular guide *How to Be Invisible*, J.J. Luna shows you how to protect yourself from these information predators by securing your vehicle and real estate ownership, your bank accounts, your business dealings, your computer files, your home address, and more. J.J. Luna, a highly trained and experienced security consultant, shows you how to achieve the privacy you crave and deserve, whether you just want to shield yourself from casual scrutiny or take your life savings with you and disappearing without a trace. Whatever your needs, Luna reveals the shocking secrets that private detectives and other seekers of personal information use to uncover information and then shows how to make a serious commitment to safeguarding yourself. There is a prevailing sense in our society that true privacy is a thing of the past. Filled with vivid real life stories drawn from the headlines and from Luna's own consulting experience, *How to Be Invisible, Revised Edition* is a critical antidote to the privacy concerns that continue only to grow in magnitude as new and more efficient ways of undermining our personal security are made available. Privacy is a commonly-lamented casualty of the Information Age and of the world's changing climate-but that doesn't mean you have to stand for it.

The Marlborough Mystery

Becklyn Publishing Group When Ben Smart and Olivia Hope disappeared on the morning of 1 January 1998, New Zealand was alerted to try to identify the ketch to which the two young people had reportedly been delivered. Many members of New Zealand's yachting community were subsequently surprised when, despite a number of possible sightings, the police shifted their investigation to Scott Watson whose boat bore no resemblance to the original description. Mike Kalaugher, however, remained unconvinced and continued his own detailed investigation of this horrendous tragedy. This thorough investigation throws into question many aspects of the police enquiry and maintains convincingly that moving the focus of the investigation to Scott Watson distracted them from the pursuit of the mystery ketch and that there is no evidence to suggest that Scott Watson is guilty. This is a sensational and worrying investigation which concludes that the mystery of Ben and Olivia has not been solved. The book is well worth a critical read. This case is another that will not go obediently away - and for uncomfortably good reasons - The Dominion Author Mike Kalaugher, an experienced yachting, takes an interesting tack, opting to focus on the yachting-related evidence. The key to this evidence is the mystery ketch seen by key witness Guy Wallace and several other witnesses, but which was eventually discounted by police. Kalaugher asserts, quite convincingly, that the sightings have never been adequately explained, casting doubt on whether it was Watson's boat that Ben and Olivia were dropped off at after the New Year's Eve party at Furneaux Lodge - The Nelson Mail About the Author Mike Kalaugher is a dedicated yachting who has an accounting practice on Waiheke Island. He comes from a yachting family and sailing has been his lifelong passion. He competed in the 1996 two-handed Round the North Island race and survived the extreme conditions of the Sydney to Hobart race of 1998 in a 30-foot yacht
