CHILDREN SOLVING PROBLEMS

Harvard University Press A one-year-old attempting to build a tower of blocks may bring the pile crashing down, yet her five-year-old sister accomplishes this task with ease. Why do young children have difficulty with problems that present no real challenge to older children? How do problem-solving skills develop? In Children Solving Problems, Stephanie Thornton surveys recent research from a broad range of perspectives in order to explore this important question. What Thornton finds may come as a surprise: successful problem-solving depends less on how smart we are--or, as the pioneering psychologist Jean Piaget claimed, how advanced our skill in logical reasoning is--and more on the factual knowledge we acquire as we learn and interpret cues from the world around us. Problem-solving skills evolve through experience and dynamic interaction with a problem. But equally important--as the Russian psychologist L. S. Vygotsky proposed--is social interaction. Successful problem-solving is a social process. Sharing problem-solving tasks--with skilled adults and with other children--is vital to a child's growth in expertise and confidence. In problem-solving, confidence can be more important than skill. In a real sense, problem-solving lies at the heart of what we mean by intelligence. The ability to identify a goal, to

work out how to achieve it, and to carry out that plan is the essence of every intelligent activity. Could it be, Thornton suggests, that problem-solving processes provide the fundamental machinery for cognitive development? In Children Solving Problems she synthesizes the dramatic insights and findings of post-Piagetian research and sets the agenda for the next stage in understanding the varied phenomena of children's problem-solving.

Heinle ELT

ENGLISH RESULT

A new general English course which focuses very strongly on student motivation and communicative speaking outcomes. Package includes DVDs and interactive whiteboard resources.

CAMBRIDGE ACADEMIC ENGLISH B2 UPPER INTERMEDIATE CLASS AUDIO CD AND DVD PACK

AN INTEGRATED SKILLS COURSE FOR EAP

Cambridge University Press A three-level (B1+ to C1) integrated skills course for higher education students at university or on foundation courses. Designed specifically for students preparing for university, this integrated skills course develops language and

academic skills essential for successful university studies across disciplines. With authentic lectures and seminars, language informed by Academic Word Lists and the Cambridge Academic Corpus, the course guarantees relevant and up-to-date English for university studies. The B2 Upper-Intermediate Class Audio CD and DVD Pack combines the Class Audio CD and DVD discs in a pack. The Audio CD and the DVD include extensive listening and video material with authentic Cambridge University lectures and interviews with university students. This material is linked to the Student's Book.

FACE2FACE INTERMEDIATE STUDENT'S BOOK WITH DVD-ROM

Cambridge University Press Face2face is the flexible, easy-to-teach General English course that helps adults and young adults to speak and listen with confidence. face2face is informed by Cambridge English Corpus and its vocabulary syllabus has been mapped to the English Vocabulary Profile, meaning students learn the language they really need at each CEFR level. The course improves students' listening skills by drawing their attention to the elements of spoken English that are difficult to understand. The free DVD-ROM in the Student's Book includes consolidation activities and electronic portfolio for learners to track their progress with customisable tests and grammar and vocabulary reference sections.

B2 UPPER INTERMEDIATE : TEACHER'S BOOK

PROTEOMICS OF PEROXISOMES

IDENTIFYING NOVEL FUNCTIONS AND REGULATORY NETWORKS

Springer This new edited volume in the Springer Subcellular Biochemistry Series presents a comprehensive, state-of-the-art overview of the proteomics of peroxisomes derived from mammalian, Drosophila, fungal, and plant origin, and contains contributions from leading experts in the field. The development of sensitive proteomics and mass spectrometry technologies, combined with

bioinformatics approaches now allow the identification of low-abundance and transient peroxisomal proteins and permits to identify the complete proteome of peroxisomes, with the consequent increase of our knowledge of the metabolic and regulatory networks of these important cellular organelles. The book lines-up with these developments and is organized in four sections including: (i) mass spectrometry-based organelle proteomics; (ii) prediction of peroxisomal proteomes; (iii) analysis of peroxisome proteome interaction networks; and (iv) peroxisomes in relation to other subcellular compartments. The editor Luis A. del Río is Professor ad honorem of the Spanish National Research Council (CSIC) in the Group of Antioxidants, Free Radicals and Nitric Oxide in Biotechnology, Food and Agriculture, Department of Biochemistry and Cell & Molecular Biology of Plants, at the Estación Experimental del Zaidín, Granada, Spain. Del Río's research group focuses on the metabolism of reactive oxygen species (ROS), reactive nitrogen species (RNS) and antioxidants in plant peroxisomes, and the ROS- and RNS-dependent role of peroxisomes in plant cell signalling. The editor Michael Schrader is Professor of Cell Biology & Cytopathology in the Department of Biosciences at the University of Exeter, UK. Using mammalian peroxisomes as model organelles, Prof. Schrader and his team aim to unravel the molecular machinery and signalling pathways that mediate and regulate the formation, dynamics and abundance of these medically relevant cellular compartments.
