COMPUTER-AIDED DRUG DESIGN

[Springer Nature](#) This book provides up-to-date information on bioinformatics tools for the discovery and development of new drug molecules. It discusses a range of computational applications, including three-dimensional modeling of protein structures, protein-ligand docking, and molecular dynamics simulation of protein-ligand complexes for identifying desirable drug candidates. It also explores computational approaches for identifying potential drug targets and for pharmacophore modeling. Moreover, it presents structure- and ligand-based drug design tools to optimize known drugs and guide the design of new molecules. The book also describes methods for identifying small-molecule binding pockets in proteins, and summarizes the databases used to explore the essential properties of drugs, drug-like small molecules and their targets. In addition, the book highlights various tools to predict the absorption, distribution, metabolism, excretion (ADME) and toxicity (T) of potential drug candidates. Lastly, it reviews in silico tools that can facilitate vaccine design and discusses their limitations.

ARMY AVIATION FLIGHT INFORMATION BULLETIN

THE LANCE ARMSTRONG PERFORMANCE PROGRAM

Pan Macmillan **In 1999 Lance Armstrong staged what many consider to be the most dramatic comeback in sports history, winning the Tour de France just three years after his body was ravaged by cancer. He has since gone on to win that event a record seven times. His courage and determination are legendary but it took more than just Lance himself to make it all happen: he got there with the help of the program, the training regime created for Lance by his coach Chris Carmichael. Now, in this updated edition of The Lance Armstrong Performance Program, Carmichael and Armstrong share the exercises, riding schedules, endurance builders and mental tricks that brought Lance back to competitive racing and on to the pinnacle of world cycling. Full of advice and personal anecdotes from Lance and his coach, this book will show you how to ride at your best in just seven weeks. Whether you are a novice or a pro, you too can ride the same path as Lance to achieve your personal best.**

CONVEX ANALYSIS AND MINIMIZATION ALGORITHMS II

ADVANCED THEORY AND BUNDLE METHODS

Springer **From the reviews: "The account is quite detailed and is written in a manner that will appeal to analysts and numerical practitioners alike...they contain everything from rigorous proofs to tables of numerical calculations.... one of the strong features of these books...that they are designed not for the expert, but for those who wish to learn the subject matter starting from little or no background...there are numerous examples, and counter-examples, to back up the theory...To my knowledge, no other authors have given such a clear geometric account of convex analysis." "This innovative text is well written, copiously illustrated, and accessible to a wide audience"**

IRISHNESS AND WOMANHOOD IN NINETEENTH-CENTURY BRITISH WRITING

Ashgate Publishing, Ltd. **Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.**
