## Who Are You?

## Nintendo's Game Boy Advance Platform

*MIT Press The Game Boy Advance platform as computational system and cultural artifact, from its 2001 release through hacks, mods, emulations, homebrew afterlives. In 2002, Nintendo of America launched an international marketing campaign for the Game Boy Advance that revolved around the slogan "Who Are You?"--asking potential buyers which Nintendo character, game, or even device they identified with and attempting to sell a new product by exploiting players' nostalgic connections to earlier ones. Today, nearly two decades after its release, and despite the development of newer and more powerful systems, Nintendo's Game Boy Advance lives on, through a community that continues to hack, modify, emulate, make, break, remake, redesign, trade, use, love, and play with the platform. In this book Alex Custodio traces the network of hardware and software afterlives of the Game Boy Advance platform.*

## The Cost of Not Educating the World's Poor

# The new economics of learning

*Routledge In The Cost of Not Educating the World's Poor, Lynn Ilon observes from her 30 years of travel and work in some 20 developing countries, how global instability, problems of environmental degradation, spread of global disease, migration and political instability are a cost of viewing the uneducated poor as separated from a networked of fast-growing global knowledge. This book shows how powerful global learning systems are rapidly forming and linking the rich world with the world of the poor and developing nations. Using a narrative voice interleaved with concise introductions to the underlying theories (economics, development, learning, technology and networks) it shows us how changing our ways of thinking can lead to new possibilities. The Cost of Not Educating the World's Poor is based on an emerging theory of development economics and the author's own vast experiences and stories. It also discusses, among other issues: International development and how it has evolved toward an emphasis on knowledge How networked human capital creates new potential for poorly resourced countries The formation of a global system of learning networks The digitization of knowledge How nations improve their well-being through knowledge and equity This inter-disciplinary assessment of international learning inequality and the methods to overcome it will appeal to researchers concerned with emerging concepts of global learning networks and their effects on development. It will also be of interest to students and policymakers studying national inequality, economics, and global development.*
