THE FISHERMAN'S HANDBOOK OF TROUT FLIES

MY CONE AND ONLY

Haver Street Press Wyatt King isn't looking for love...because he's already found it. Too bad she's off-limits. He's not going to be the jerk who messes around with his best friend's little sister, so he keeps his feelings bottled up and settles for acting as her protector instead. Andie Lockhart's dreamed of kissing Wyatt for as long as she's known what kissing is. But since he's dated nearly every woman in town but her, she's long since accepted he'll never see her as anything more than his best friend's tomboy little sister. When a real estate developer threatens the beloved old house Andie inherited from her grandmother, her white knight Wyatt swoops in with his handyman skills to save the day. But the more time they spend working on the house together, the harder it becomes to ignore their irresistible attraction. Until the night an accidental kiss blows the lid off those feelings they've both kept buried. After that, things between them get a lot hotter—and a lot more complicated. Forbidden love, broken promises, family secrets, and jealousy all threaten to tear them apart. If he intends to hold on to the woman he loves, Wyatt will have to put everything on the line. My Cone and Only is book #1 in the King Family series set in the small town of Crowder, Texas, home of the King's Creamery ice company. Each book is a standalone, full-length contemporary romance that follows one of the six King siblings as they find and fight for love.

INCINERATION OF MUNICIPAL WASTE

SPECIALIZED SEMINARS ON INCINERATOR EMISSIONS OF HEAVY METALS AND PARTICULATES, COPENHAGEN, 18-19 SEPTEMBER 1985 AND EMISSION OF TRACE ORGANICS FROM MUNICIPAL SOLID WASTE INCINERATORS, COPENHAGEN, 20-22 JANUARY 1987

Elsevier Incineration of Municipal Waste brings together the proceedings of two specialized seminars dealing with emissions from modern municipal waste incinerators and held in Copenhagen, Denmark: Incinerator Emissions of Heavy Metals and Particulates, held on September 18-19, 1985, and Emission of Trace Organics from Municipal Solid Waste Incinerators, held on January 20-22, 1987. The papers explore how modern stack gas cleaning equipment can reduce the emission of toxic substances, whether metallic or organic. Comprised of 36 chapters, this book begins with an overview of the fundamentals and salient features of energy-dispersive X-ray fluorescence spectroscopy for monitoring of heavy metals. The discussion then turns to gas cleaning methods such as dry scrubbing systems using slurry injection; measurements of mercury in flue gases from the Högdalen incinerator in Stockholm, Sweden; the performance of electrostatic precipitators; and the role of cadmium and mercury in municipal solid waste incineration. Subsequent chapters focus on the flux of metals through municipal solid waste incinerators; health effects of chlorinated dioxin and other trace organic emissions; and total organic carbon emissions from municipal incinerators. This monograph will be of interest to government officials and environmental policymakers.
