Precalculus with Limits

Cengage Learning *Larson's PRECALCULUS WITH LIMITS is known for delivering the same sound, consistently structured explanations and exercises of mathematical concepts as the market-leading PRECALCULUS, with a laser focus on preparing students for calculus. In LIMITS, the author includes a brief algebra review of core precalculus topics along with coverage of analytic geometry in three dimensions and an introduction to concepts covered in calculus. With the Fourth Edition, Larson continues to revolutionize the way students learn material by incorporating more real-world applications, ongoing review, and innovative technology. How Do You See It? exercises give students practice applying the concepts, and new Summarize features, and Checkpoint problems reinforce understanding of the skill sets to help students better prepare for tests. The companion website LarsonPrecalculus.com offers free access to multiple tools and resources to supplement students' learning. Stepped-out solution videos with instruction are available at CalcView.com for selected exercises throughout the text. Guide to the Software Engineering Body of Knowledge (Swebok(r))

Version 3.0

In the Guide to the Software Engineering Body of Knowledge (SWEBOK(R) Guide), the IEEE Computer Society establishes a baseline for the body of knowledge for the field of software engineering, and the work supports the Society's responsibility to promote the advancement of both theory and practice in this field. It should be noted that the Guide does not purport to define the body of knowledge but rather to serve as a compendium and guide to the knowledge that has been developing and evolving over the past four decades. Now in Version 3.0, the Guide's 15 knowledge areas summarize generally accepted topics and list references for detailed information. The editors for Version 3.0 of the SWEBOK(R) Guide are Pierre Bourque (Ecole de technologie superieure (ETS), Universite du Quebec) and Richard E. (Dick) Fairley (Software and Systems Engineering Associates (S2EA)).

Harmonic Analysis on Homogeneous Spaces

Courier Dover Publications *This book is suitable for advanced undergraduate and graduate students in mathematics with a strong background in linear algebra and advanced calculus. Early chapters develop representation theory of compact Lie groups with applications to topology, geometry, and analysis, including the Peter-Weyl theorem, the theorem of the highest weight, the character theory, invariant differential operators on homogeneous vector bundles, and Bott's index theorem for such operators. Later chapters study the structure of representation theory and analysis of non-compact semi-simple Lie groups, including the principal series, intertwining operators, asymptotics of matrix coefficients, and an important special case of the Plancherel theorem. Teachers will find this volume useful as either a main text or a supplement to standard one-year courses in Lie groups and Lie algebras. The treatment advances from fairly simple topics to more complex subjects, and exercises appear at the end of each chapter. Eight helpful Appendixes develop aspects of differential geometry, Lie theory, and functional analysis employed in the main text.*

Wavelets, Their Friends, and what They Can Do for You

European Mathematical Society *These notes introduce the central concepts surrounding wavelets and their applications. By focusing on the essential ideas and arguments, the authors enable readers to get to the heart of the matter as quickly as possible. A list of references guides readers interested in further study to the appropriate places in the literature for detailed proofs and real applications. The authors begin with the notion of time-frequency analysis, present the multiresolution analysis and basic wavelet construction, introduce the many friends, relatives, and mutations of wavelets, and finally give a selection of applications. This book is suitable for beginning graduate students and above. A preliminary chapter containing some of the prerequisite concepts and definitions is included for reference.*

Spatial Ecology via Reaction-Diffusion Equations

John Wiley & Sons *Many ecological phenomena may be modelled using apparently random processes involving space (and possibly time). Such phenomena are classified as spatial in their nature and include all aspects of pollution. This book addresses the problem of modelling spatial effects in ecology and population dynamics using reaction-diffusion models. * Rapidly expanding area of research for biologists and applied mathematicians * Provides a unified and coherent account of methods developed to study spatial ecology via reaction-diffusion models * Provides the reader with the tools needed to construct and interpret models * Offers specific applications of both the models and the methods * Authors have played a dominant role in the field for years Essential reading for graduate students and researchers working with spatial modelling from mathematics, statistics, ecology, geography and biology.*

Hemavid - Version 3. 0

MIT Press (MA) *HEMAVID offers students and physicians easy access to a large library of images of blood and bone marrow morphology, with descriptions by one of the world's foremost authorities on the subject. The program was developed at Harvard Medical School to accompany the fifth edition of William S. Beck's text, Hematology. It can be used in conjunction with courses using that book, with review courses in hospitals or medical schools, or for self-study. In all there are more than 1,300 images divided into five categories: - Blood and Bone Marrow Methods - Red Cells - White Cells - Megakaryocytes and Platelets - Infections The program includes an extensive hierarchical menu that permits users to examine multiple examples of all of the major hematologic disorders discussed in Hematology. The accompanying descriptions cross-reference the text. Specifications: The program requires an IBM-compatible computer running Windows, with a CD-ROM drive, a 24-bit True Color card, and a 680 x 480 VGA monitor.*

Disaster Operations Legal Reference Version 3. 0

Federal Emergency Management Agency *This texts creates a coherent narrative that both describes and explains the essential elements of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) and related legal authorities underpinning FEMA's disaster operations. The Disaster Operations Legal Resource (DOLR) is organized around the construct of an Emergency Management Operation Life Cycle (Chapter 1) with phases involving distinct operational and legal concerns, including: Disaster Readiness (Chapter 2), Declarations (Chapter 3), Response (Chapter 4), Public Assistance (Chapter 5), Individual Assistance (Chapter 6), Hazard Mitigation (Chapter 7), Environmental and Historic Preservation Laws (Chapter 8), Information Management (Chapter 9), Human Capital (Chapter 10), and Ethics (Chapter 11). The DOLR is intended to provide FEMA, as well as state, tribal, and local government (and non-governmental partners), with detailed legal information that explains how and when the Stafford Act applies, and how it relates to the Homeland Security Act (HSA) and other relevant authorities and policies. In addition, law enforcement and first responders may be interested in the DOLR.*

Challenging Concepts in Neurology

Cases with Expert Commentary

Oxford University Press *This volume is a case-based guide to challenging clinical scenarios in neurology, covering 25 sub-speciality areas of the neurology curriculum. Each chapter is based around a potential real-life case, which is used as a platform to discuss the subject in a broader way and to explore the most up-to-date evidence regarding diagnosis and management.*
