**Bioaugmentation Techniques and Applications in Remediation** [CRC Press](#) This book provides detailed information on bioaugmentation approaches for remediation of sediments, water, and soil polluted with organic and inorganic pollutants. Practical applications of bioaugmentation techniques performed in restricted systems under controlled conditions, laboratory investigations, and field applications are all addressed. **Marketing Research** [Nirali Prakashan](#) **wireless java programming for enterprise applications** [John Wiley & Sons](#) **Gazetteer of the Bombay Presidency: Surat and Broach** **Visual Basic 2008 How to Program** [Prentice Hall](#) **Appropriate for all basic-to-intermediate level courses in Visual Basic 2008 programming. Created by world-renowned programming instructors Paul and Harvey Deitel, Visual Basic 2008 How to Program, Fourth Edition introduces all facets of the Visual Basic 2008 language hands-on, through hundreds of working programs. This book has been thoroughly updated to reflect the major innovations Microsoft has incorporated in Visual Basic 2008 and .NET 3.5; all discussions and sample code have been carefully audited against the newest Visual Basic language specification. The many new platform features covered in depth in this edition include: LINQ data queries, Windows Presentation Foundation (WPF), ASP.NET Ajax and the Microsoft Ajax Library, Silverlight-based rich Internet application development, and creating Web services with Windows Communication Foundation (WCF). New language features introduced in this edition: object anonymous types, object initializers, implicitly typed local variables and arrays, delegates, lambda expressions, and extension methods. Students begin by getting comfortable with the free Visual Basic Express 2008 IDE and basic VB syntax included on the CD. Next, they build their skills one step at a time, mastering control structures, classes, objects, methods, variables, arrays, and the core techniques of object-oriented programming. With this strong foundation in place, the Deitels introduce more sophisticated techniques, including inheritance, polymorphism, exception handling, strings, GUI's, data structures, generics, and collections. Throughout, the authors show developers how to make the most of Microsoft's Visual Studio tools. A series of appendices provide essential programming reference material on topics ranging from number systems to the Visual Studio Debugger, UML 2 to Unicode and ASCII.** **Notebook Pineapple Costume Dot Grid 6x9 120 Pages** This Notebook makes a great present for Christmas, Easter and birthdays. **When the School Horse was King : a Tribute to Faithful Friends and Companions** [Douglas & McIntyre Limited](#) **Pwc 2003** [Infinity Publishing](#) **When God Goes to Starbucks A Guide to Everyday Apologetics** [Baker Books](#) **More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In When God Goes to Starbucks, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.** **Nurturing Praxis Action Research in Partnerships between School and University in a Nordic Light** [BRILL](#) **Nurturing Praxis offers a distinctive view of collaborative and action research in educational settings in four Nordic countries; Sweden, Norway, Finland and Iceland. Educational action research in Nordic countries is interpreted as being informed by the traditions of Bildung and (folk) enlightenment and thereby emphasizing the importance of collaboration, discussion and dialogue in knowledge creation.** **My Unicorn Authors We all have them, right? **NASA Goddard Space Flight Center Cooperative Enterprise The viability of a Capillary Heat Pump (CHP) concept using a Loop Heat Pipe evaporator and an eductor in a closed loop to reject heat at a higher temperature than it is acquired at with the goal of reducing spacecraft radiator area is examined. Eductor inefficiency resulting from the mixing of high velocity motive flow with low velocity suction flow may preclude spacecraft radiator area savings. The utility of a CHP for thermal management may be limited to those missions where system mass is of secondary concern compared to system reliability, or where a heat pump is required to accommodate relatively high thermal rejection temperatures. Shearography techniques for nondestructive inspection and evaluation were examined for two unique applications. Shearography is shown to give good results in evaluating the quality of bonds holding lead tiles to the SWIFT spacecraft BAT gamma ray mask. Also, a novel technique was developed allowing specular objects to be inspected using shearography to evaluate bonding between the skin and core of a specular surface honeycomb structure. Large-scale bond failures are readily identified.**

[Cambridge University Press](#) **From Socrates and Plato onwards, the Sophists were often targeted by the authoritative philosophical tradition as being mere charlatans and poor teachers. This book, translated and significantly updated from its most recent Italian version (2nd edition, 2013), challenges these criticisms by offering an overall interpretation of their thought, and by assessing the specific contributions of thinkers like Protagoras, Gorgias and Antiphon. A new vision of the Sophists emerges: they are protagonists and agents of fundamental change in the history of ancient philosophy, who questioned the grounds of morality and politics, as well as the nature of knowledge and language. By shifting the focus from the cosmos to man, the Sophists inaugurate an alternative form of philosophy, whose importance is only now becoming clear.**
