The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems. **Labor Economics** Gardner Press *Labor Economics, 5e* is a well-received text that blends coverage of traditional topics with modern theory and developments into a superb *Labor Economics* book. The Fifth Edition builds on the features and concepts that made the first four editions successful, updating and adding new content to keep the text on the cusp of recent events in the *Labor Economics* field. The new edition continues to be the most concise book in the market, enabling the instructor to teach all relevant material in a semester-long class. Despite the book's brevity, the instructor will find that all of the key topics in labor economics are efficiently covered in the Fifth Edition. Thanks to updated pedagogy, new end-of-chapter material, and even stronger instructor support, the Fifth Edition of *Labor Economics* remains one of the most relevant textbooks in the market. **Murder in the Delta The Emmett Till Story** Page Publishing Inc The story of Emmett Till is a riveting, notorious murder case that gave birth to the modern-day civil rights movement, a story that continues to generate enormous interest from the general public and the media at large.
