### GLOBAL RISK AGILITY AND DECISION MAKING

---

---

### ORGANIZATIONAL RESILIENCE IN THE ERA OF MAN-MADE RISK

---

Springer In Global Risk Agility and Decision Making, Daniel Wagner and Dante Disparte, two leading authorities in global risk management, make a compelling case for the need to bring traditional approaches to risk management and decision making into the twenty-first century. Based on their own deep and multi-faceted experience in risk management across numerous firms in dozens of countries, the authors call for a greater sense of urgency from corporate boards, decision makers, line managers, policymakers, and risk practitioners to address and resolve the plethora of challenges facing today's private and public sector organizations. Set against the era of manmade risk, where transnational terrorism, cyber risk, and climate change are making traditional risk models increasingly obsolete, they argue that remaining passively on the side-lines of the global economy is dangerous, and that understanding and actively engaging the world is central to achieving risk agility. Their definition of risk agility taps into the survival and risk-taking instincts of the entrepreneur while establishing an organizational imperative focused on collective survival. The agile risk manager is part sociologist, anthropologist, psychologist, and quant. Risk agility implies not treating risk as a cost of doing business, but as a catalyst for growth. Wagner and Disparte bring the concept of risk agility to life through a series of case studies that cut across industries, countries and the public and private sectors. The rich, real-world examples underscore how once mighty organizations can be brought to their knees—and even their demise by simple miscalculations or a failure to just do the right thing. The reader is offered deep insights into specific risk domains that are shaping our world, including terrorism, cyber risk, climate change, and economic resource nationalism, as well as a frame of reference from which to think about risk management and decision making in our increasingly complicated world. This easily digestible book will shed new light on the often complex discipline of risk management. Readers will learn how risk management is being transformed from a business prevention function to a values-based framework for thriving in increasingly perilous times. From tackling governance structures and the tone at the top to advocating for greater transparency and adherence to value systems, this book will establish a new generation of risk leader, with clarion voices calling for greater risk agility. The rise of agile decision makers coincides with greater resilience and responsiveness in the era of manmade risk.

#### SHARK TROUBLE

---

---

---

#### TRUE STORIES AND LESSONS ABOUT THE SEA

---

Ballantine Books Drawing on more than three decades of experience writing about sharks and other marine animals, the bestselling author of Jaws combines high adventure with practical information in a book that is at once a thriller and a valuable guide to being safe in, on, under, and around the sea. "Shark attacks on human beings generate a tremendous amount of media coverage," Benchley writes, "partly because they occur so rarely, but mostly, I think, because people are, and always have been, simultaneously intrigued and terrified by sharks. Sharks come from a wing of the dark castle where our nightmares live—deep water beyond our sight and understanding—and so they stimulate our fears and fantasies and imaginations." Benchley describes the many types of sharks (including the ones that pose a genuine threat to man), what is and isn't known about shark behavior, the odds against an attack and how to reduce them even further—all reinforced with the lessons he has learned, the mistakes he has made, and the personal perils he has encountered while producing television documentaries, bestselling novels, and articles about the sea and its inhabitants. He tells how to swim safely in the ocean, how to read the tides and currents, what behavior to avoid, and how to survive when danger suddenly strikes. He discusses how to tell children about sharks and the sea and how to develop, in young and old alike, a healthy respect for the ocean. As Benchley says, "The ocean is the only alien and potentially hostile environment on the planet into which we tend to venture without thinking about the animals that live there, how they behave, how they support themselves, and how they perceive us. I know of no one who would set off into the jungles of Malaysia armed only with a bathing suit, a tube of suntan cream, and a book, and yet that's precisely how we approach the oceans." No longer. Not after you've read Shark Trouble.

**PURSuing LESS AND LIVING MORE IN A THROWAWAY CULTURE**

---

---

Ave Maria Press Do you ever feel caught in an endless cycle of working harder and longer to get more while enjoying life less? The Stewart family did—and they decided to make a radical change. Popular Catholic blogger and podcaster Haley Stewart explains how a year-long internship on a sustainable farm changed her family's life for the better, allowing them to live gospel values more intentionally. When Haley Stewart married her bee-keeping sweetheart, Daniel, they dreamed of a life centered on home and family. But as the children arrived and Daniel was forced to work longer hours at a job he liked less and less, they dared to break free from the unending cycle of getting more yet feeling unfulfilled. They sold their Florida home and retreated to Texas to live on a farm with a compost toilet and 650 square feet of space for a family of five. Surprisingly, they found that they had never been happier. In *The Grace of Enough*, Stewart shares essential elements of intentional Christian living that her family discovered during that extraordinary year on the farm and that they continue to practice today. You, too, will be inspired to: live simply offer hospitality revive food culture and the family table reconnect with the land nurture community prioritize beauty develop a sense of wonder be intentional about technology seek authentic intimacy center life around home, family, and relationships Drawing from Pope Francis's encyclical on the environment, *Laudato Si'*, Stewart identifies elements of Catholic social teaching that will enhance your life and create a ripple effect of grace to help you overcome the effects of today's "throwaway" culture and experience a deeper satisfaction and stronger faith.

**HOW TO SELECT FOR, MEASURE, AND IMPROVE EMOTIONAL INTELLIGENCE IN INDIVIDUALS, GROUPS, AND ORGANIZATIONS**

---

---

John Wiley & Sons How does emotional intelligence as a competency go beyond the individual to become something a group or entire organization can build and utilize collectively? Written primarily by members of the Consortium for Research on Emotional Intelligence in Organizations, founded by recognized EI experts Daniel Goleman and Cary Cherniss, this groundbreaking compendium examines the conceptual and strategic issues involved in defining, measuring and promoting emotional intelligence in organizations. The book's contributing authors share fifteen models that have been field-tested and empirically validated in existing organizations. They also detail twenty-two guidelines for promoting emotional intelligence and outline a variety of measurement strategies for assessing emotional and social competence in organizations.

**HABITUS AND ETHNOGRAPHIES OF MARTIAL ARTS AND COMBAT SPORTS**

---

---

Anthem Press 'Fighting Scholars' offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book's main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of 'habitus' is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body. The book's most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Loïc Wacquant's 'Body and Soul': the construction of a 'carnal sociology' that constitutes an exploration of the social world 'from' the body.
