I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. "The world has a great writer in Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and sure."—The New York Times Book Review **Guide for All-Hazard Emergency Operations Planning DIANE Publishing** Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. Guideline for Isolation Precautions in Hospitals Natural Gas and Propane Installation Code Catalogue Official Gazette of the United States Patent and Trademark Office Patents Modern Concepts of Security AuthorHouse** I have been associated with the security operations at various levels of jurisdictions from the National security policing (covert operations) to the Industrial/Commercial security setup; to Corporations proprietary security practice and supervision over the past three

decades. In this stretch, I have come to be conscious of the vital necessity for comprehensive documentation of security and safety archetypes for the study of this unique profession in which reference materials for developing core and universal curricula for training or self improvement of security operatives are hard to come by. Mainly because most law enforcement agents or persons charged with security managements Law enforcement officers; Security Directors, Fire Safety Directors, the police and even Contract Security firms have hardly come to terms with the professional demands of this specialized professional calling which has assumed the centre stage of global reckoning of the present-day. With these concerns, I have designed this book to be a working companion to personnel and agencies in the security professional vocation along with students of peace and conflicts studies; criminology and security studies the Armed forces personnel and other National Security Agents (DSS, DIA, NIA, NAFDAC, NDLEA, etc.); the Para-military (Police, ICPC, EFCC, Customs & Excise and Immigrations departments, FRSC, NCDC, NEMA and a host of others). In essence, modern security outlook incorporates the Human Security schools of thought which is all about the practice of holistic and global security that is a shift from the traditional conception of National Security (a state-centred approach) to focus on the wellbeing of individuals, which is yet to be cultivated in the African continent resulting in enduring problems of disease, poverty, security adversities, violence and insurgences, human rights abuses and civil strives. The reference volumes afford abundant valuable materials on modern concepts of security meant to offer sound basic knowledge for security practitioners, contract security firms as well as for individual reading to boost security consciousness of the entire public which can be adapted, modified, rejected or used for the reader's own purposes. I therefore entrust this book to the kind consideration of security practitioners and managers in general, especially the certified national and international security and law enforcement professionals. I hope that the contents will be of material benefit to the entire security community because it is only when knowledge is applied specifically to the needs of a particular skill that it becomes of true value. Therein lays the reader's part.

Her earliest memories are marked by these numbers, but it takes her father's premature death for Maddie and her family to realize that these mysterious digits are actually deathdates, and just like birthdays, everyone has one. Forced by her alcoholic mother to use her ability to make extra money, Maddie identifies the quickly approaching deathdate of one client's young son, but because her ability only allows her to see the when and not the how, she's unable to offer any more insight. When the boy goes missing on that exact date, law enforcement turns to Maddie. Soon, Maddie is entangled in a homicide investigation, and more young people disappear and are later found murdered. A suspect for the investigation, a target for the murderer, and attracting the attentions of a mysterious young admirer who may be connected to it all, Maddie's whole existence is about to be turned upside down.
