Learning from the Inside-Out

Child Development and School Choice

Rowman & Littlefield Learning from the Inside-Out: Child Development and School Choice is the first book of its kind to marry child development, educational psychology, neuroscience, and pedagogy. This book goes beyond the now banal conversation of differentiating students based upon gender, race, and class. This book is about the cognitive and social needs of students throughout the developmental span and how to identify schools that meet those needs. In essence, this book rejects the one-size-fits-all discourse of education reform in favor of a focus on individualized educational decision-making. Learning from the Inside-Out acknowledges that contrary to the popular saying, good teaching is not good teaching. What one student needs in a teacher, classroom environment or curricula is not necessarily what another student might need despite demographic similarities. After reading this book, parents and teachers will be empowered and informed when making decisions about how best to educate children.

Inside Out

A Memoir

HarperCollins INSTANT #1 NEW YORK TIMES BESTSELLER A Best Book of the Year: The New Yorker, The Guardian, The Sunday Times, The Daily Mail, Good Morning America, She Reads Famed American actress Demi Moore at last tells her own story in a surprisingly intimate and emotionally charged memoir. For decades, Demi Moore has been synonymous with celebrity. From iconic film roles to high-profile relationships, Moore has never been far from the spotlight—or the headlines. Even as Demi was becoming the highest paid actress in Hollywood, however, she was always outrunning her past, just one step ahead of the doubts and insecurities that defined her childhood. Throughout her rise to fame and during some of the most pivotal moments of her life, Demi battled addiction, body image issues, and childhood trauma that would follow her for years—all while juggling a skyrocketing career and at times negative public perception. As her success grew, Demi found herself questioning if she belonged in Hollywood, if she was a good mother, a good actress—and, always, if she was simply good enough. As much as her story is about adversity, it is also about tremendous resilience. In this deeply candid and reflective memoir, Demi pulls back the curtain and opens up about her career and personal life—laying bare her tumultuous relationship with her mother, her marriages, her struggles balancing stardom with raising a family, and her journey toward open heartedness. Inside Out is a story of survival, success, and surrender—a wrenchingly honest portrayal of one woman's at once ordinary and iconic life.

The Leader in Me

How Schools and Parents Around the World are Inspiring Greatness, One Child at a Time

Simon and Schuster Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

InSideOut Coaching

How Sports Can Transform Lives

Simon and Schuster In this inspirational yet practical book, the man Parade called "the most important coach in America," subject of the national bestseller *Season of Life*, Joe Ehrmann, describes his coaching philosophy and explains how sports can transform lives at every level of play, from the earliest years to professional sports. Coaches have a tremendous platform, says Joe Ehrmann, a former Syracuse University All-American and NFL star. Perhaps second only to parents, coaches can impact young people as no one else can. But most coaches fail to do the teaching, mentoring, even life-saving intervention that their platform provides. Too many are transactional coaches; they focus solely on winning and meeting their personal needs. Some coaches, however, use their platform. They teach the Xs and Os, but also teach the Ys of life. They help young people grow into responsible adults; they leave a lasting legacy. These are the transformational coaches. These coaches change lives, and they also change society by helping to develop healthy men and women. *InSideOut Coaching* explains how to become a transformational coach. Coaches first have to "go inside" and articulate their reasons for coaching. Only those who have taken the *InSideOut* journey can become transformational. Joe Ehrmann provides examples of coaches in his life who took this journey and taught him how to find something bigger than himself in sports. He describes his own *InSideOut* experience, starting with the death of his beloved brother, which helped him understand how sports could transcend the playing field. He gives coaches the information and the tools they need to become transformational. Joe Ehrmann has taken his message about the extraordinary power of sports all over the country. It has been warmly endorsed by NFL head coaches, athletic directors at major universities, high school head coaches, even business groups and community organizations. Now any parent-coach or school or community coach can read Ehrmann's message and learn how to make sports a life-changing experience.

Experiencing Schema Therapy from the Inside Out

A Self-Practice/Self-Reflection Workbook for Therapists

Guilford Publications This unique resource helps therapists build their skills in schema therapy (ST) by applying ST techniques to themselves and reflecting on the experience. Designed for use by individuals or groups, the book harnesses the power of self-practice/self-reflection (SP/SR), an evidence-based training strategy. Twenty modules take therapists step by step through using ST to address a professional or personal problem--from establishing safety and creating a self-conceptualization to implementing mode change work, including cognitive, experiential, and behavioral pattern-breaking interventions. In a convenient large-size format, the book is illustrated with vivid therapist examples and features numerous reproducible worksheets and forms for doing the SP/SR exercises. Purchasers get access to a Web page where they can download and print the reproducible materials.ÿ ÿ

Creating Your Dream Classroom from the Inside Out!

The Brain from Inside Out

Oxford University Press Is there a right way to study how the brain works? Following the empiricist's tradition, the most common approach involves the study of neural reactions to stimuli presented by an experimenter. This 'outside-in' method fueled a generation of brain research and now must confront hidden assumptions about causation and concepts that may not hold neatly for systems that act and react. György Buzsáki's *The Brain from Inside Out* examines why the outside-in framework for understanding brain function have become stagnant and points to new directions for understanding neural function. Building upon the success of *Rhythms of the Brain*, Professor Buzsáki presents the brain as a foretelling device that interacts with its environment through action and the examination of action's consequence. Consider that our brains are initially filled with nonsense patterns, all of which are gibberish until grounded by action-based interactions. By matching these nonsense "words" to the outcomes of action, they acquire meaning. Once its circuits are "calibrated" by action and experience, the brain can disengage from its sensors and actuators, and examine "what happens if" scenarios by peeking into its own computation, a process that we refer to as cognition. *The Brain from Inside Out* explains why our brain is not an information-absorbing coding device, as it is often portrayed, but a venture-seeking explorer constantly controlling the body to test hypotheses. Our brain does not process information: it creates it.

Know Your Price

Valuing Black Lives and Property in America's Black Cities

Brookings Institution Press The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilkinsburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilkinsburg, Perry also spotlights five others where he has deep connections: Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities. Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. *Know Your Price* demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal book, are what we need to know and understand to build Black prosperity.

Parenting from the Inside Out

How a Deeper Self-Understanding Can Help You Raise Children Who Thrive: 10th Anniversary Edition

Penguin An updated edition—with a new preface—of the bestselling parenting classic by the author of "BRAINSTORM: The Power and Purpose of the Teenage Brain" In *Parenting from the Inside Out*, child psychiatrist Daniel J. Siegel, M.D., and early childhood expert Mary Hartzell, M.Ed., explore the extent to which our childhood experiences shape the way we parent. Drawing on stunning new findings in neurobiology and attachment research, they explain how interpersonal relationships directly impact the development of the brain, and offer parents a step-by-step approach to forming a deeper understanding of their own life stories, which will help them raise compassionate and resilient children. Born out of a series of parents' workshops that combined Siegel's cutting-edge research on how communication impacts brain development with Hartzell's decades of experience as a child-development specialist and parent educator, this book guides parents through creating the necessary foundations for loving and secure relationships with their children.

Doing School

How We Are Creating a Generation of Stressed Out, Materialistic, and Miseducated Students

Yale University Press This book offers a highly revealing and troubling view of today's high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today's schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

In addition, it offers exciting new chapters, on attachment, relational, and intersubjective theories, respectively, as well as on trauma.

Change from the Inside Out

Making You, Your Team, and Your Organization Change-Capable

Berrett-Koehler Publishers Change initiatives fail because humans are hardwired to return to what's worked for us in the past. This book offers a straightforward process for rewiring ourselves and those we lead to be more change-capable. Erika Andersen says avoiding change has been a historical imperative. In this book, she shows how we can overcome that reluctance and get good at making necessary change. Using a fictional story about a jewelry business changing generational hands, Andersen lays out a five-step model for addressing both this human side of change and its practical aspects: Step 1: Clarify the change and why it's needed—Get clear on what the change is and the benefits it will bring. Step 2: Envision the future state—Build a shared picture of the post-change future. Step 3: Build the change—Bring together a change team, engage key stakeholders, and plan the change. Step 4: Lead the transition—Build a transition plan that supports the human side of the change, then engage the whole organization in making the change. Step 5: Keep the change going—Work to make your organization permanently more change-capable. With opportunities to self-reflect and try out the ideas and approaches throughout, this book is a practical guide to thriving in this era of nonstop change.

That College Book

Everything Nobody Told Us about Life After High School

Createspace Independent Publishing Platform In high school, everyone's talking about college. What to do. Where to go. Why it's important. Classes are given on it. Books are written about it. But details get left out. Every year, college graduates learn this the hard way as they step into adulthood. I was one of them. After earning a four-year degree, I went through two of the worst years of my life. Not that my situation is unique. I am a part of a generation that was told to go to college first and sort out the details later. Most of us did. We chased the promise of a big shiny future, and we ended up being chased by the mistakes of our past. That's not to say we completely regretted going. This book isn't a list of privileged millennial complaints. It's a collection of wisdom gained in less than pleasant ways. It's a story of hardship, failure, victory, and perseverance. It's all of the things we wish someone had told us. And it takes place before college, in college, after college, and without college. This is the wild, painful, awkward, hilarious, depressing, & beautiful journey from youth to maturity. This is the college book that no one ever gave us.

Turned Inside Out: the Official Story of Obituary

Tampa, Florida's Obituary has been a death metal institution since 1984. Guided by the inhuman, if not unfathomably deranged vocals of John Tardy, the obscenely brutal guitar tone of Trevor Peres and rhythmic brilliance of drummer Donald Tardy, Obituary defined heaviness throughout the 1990s. Their 1989 'Slowly We Rot' and 1990 'Cause of Death' studio albums are undisputed classics, but their live prowess and unwavering dedication to their fans made them one of the metal underground's most respected bands. An unexpected five-year hiatus starting in 1998 only saw Obituary's stature grow when a new generation of bands adopted their sonic trademarks. However, their post-reformation efforts were nearly sidetracked by the perils of the music industry and inter-band tumult. Through the unbreakable bond between the Tardy brothers and Peres, Obituary emerged stronger than ever, entrenched in their rightful position as death metal vanguards. 'Turned Inside Out: The Official Story of Obituary' is the fully authorized biography of Obituary, providing an unprecedented look into the band's career through in-depth interviews, studio recollections, road stories and scores of exclusive photos.
