Slavery and slave trading, though little researched, were common across wide stretches of Eurasia, and a slave economy played a vital part in the political and cultural contacts between Russia and its Eurasian neighbours. This volume concentrates on captivity, slavery, ransom and abolition in the vicinity of the Eurasian steppe from the early modern period to recent developments and explores their legacy and relevance down to the modern times. The contributions centre on the Russian Empire, while bringing together scholars from various historical traditions of the leading states in this region, including Poland-Lithuania and the Ottoman Empire, and their various successor states. At the centre of attention are transfers, transnational fertilizations and the institutions, rituals and representations facilitating enslavement, exchanges and ransoming. The essays in this collection define and quantify slavery, covering various regions in the steppe and its vicinity and looking at trans-cultural issues and the implications of slavery and ransom for social, economic and political connections across the steppe. In so doing the volume provides both a broad overview of the subject, and a snapshot of the latest research from leading scholars working in this area. **The Oxford Handbook of Cities in World History Oxford University Press** In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns. Jack Goldstone shows the important role of population changes, youth bulges, urbanization, elite divisions, and fiscal crises in creating major political crises. Goldstone shows how state breakdowns in both western monarchies and Asian empires followed the same patterns, triggered when inflexible political, economic, and social institutions were overwhelmed by cumulative changes in population structure that collided with popular aspirations and state-elite relations. Examining the great revolutions of Europe—the English and French Revolutions—and the great rebellions of Asia, which shattered dynasties in Ottoman Turkey, China, and Japan, he shows how long cycles of revolutionary crises and stability similarly shaped politics in Europe and Asia, but led to different outcomes. In this 25th anniversary edition, Goldstone reflects on the history of revolutions in the last twenty-five years, from the Philippines and other color revolutions to the Arab Uprisings and the rise of the Islamic State. In a new introduction, he re-examines his pioneering look at the role of population changes—such as rising youth cohorts, urbanization, shifting elite mobility—as continuing causal factors of revolutions and rebellions. The new concluding chapter updates his major theory and looks to the future of revolutions in the Middle East, Asia, and Africa. **Teaching World History in the Twenty-first Century: A Resource Book A Resource Book Routledge** This practical handbook is designed to help anyone who is preparing to teach a world history course - or wants to teach it better. Nearly half of all 300 million Americans take at least one prescription drug daily, accounting for \$250 billion per year in sales in the US alone. And this number doesn't even include the over-the-counter medications or health aids that are taken. How did this practice become such an essential part of our lives and our health? A Brief History of Pharmacy: Humanity's Search for Wellness aims to answer that question. As this short overview of the practice shows, the search for well-being through the ingestion or application of natural products and artificially derived compounds is as old as humanity itself. From the Mesopotamians to the corner drug store, Bob Zebroski describes how treatments were sought, highlights some of the main victories of each time period, and shows how we came to be people who rely on drugs to feel better, to live longer, and look younger. This accessible survey of pharmaceutical history is essential reading for all students of pharmacy. **Chambers's Historical Questions, with answers. Honour of Kings Ancient and American History 1 Test Packet & Answer Key Lulu.com World History An Introduction Routledge** World History: An Introduction provides readers with the knowledge and tools necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present. A concise and original guide to the concepts, methods, debates and contents of world history, it combines a thematic approach with a clear and ambitious focus. Each chapter traces connections with the past and the present to explore major questions in world history: How did humans evolve from an endangered species to the most successful of them all? How has nature shaped human history? How did agricultural societies push human history in a new direction? How has humankind organized itself in ever more complex administrative systems? How have we developed new religious and cultural patterns? How have the paths of 'The West' and 'The Rest' diverged over the last five centuries? How, at the same time, has the world become more interconnected and "globalized"? How is this world characterized by growing gaps in wealth, poverty and inequality? Sharp and accessible, Eric Vanhaute's introduction to this exciting field demonstrates that world history is more of a perspective than a single all-encompassing narrative: an instructive new way of seeing, thinking and doing. It is an essential resource for students of history in a global context. **Examination Papers for Admission to the U.S. Naval Academy The Curse of Ham in the Early Modern Era The Bible and the Justifications for Slavery Taylor & Francis** For hundreds of years, the biblical story of the Curse of Ham was marshalled as a justification of serfdom, slavery and human bondage. According to the myth, having seen his father Noah naked, Ham's is cursed to have his descendants be forever slaves. In this new book the Curse of Ham is explored in its Reformation context, revealing how it became the cornerstone of the Christian defence of slavery and the slave trade for the next four hundred years. It shows how broader medieval interpretations of the story became marginalized in the early modern period as writers such as Annius of Viterbo and George Best began to weave the legend of Ham into their own books, expanding and adding to the legend in ways that established a firm connection between Ham, Africa, slavery and race. For although in the original biblical text Ham himself is not cursed and race is never mentioned, these writers helped develop the story of Ham into an ideological and theological defence for African slavery, at the precise time that the Transatlantic Slave Trade began to establish itself as a major part of the European economy during the sixteenth and seventeenth centuries. Skillfully weaving together elements of theology, literature and history, this book provides a fascinating insight into the ways that issues of religion, economics and race could collide in the Reformation world. It will prove essential reading, not only for those with an interest in early modern history, but for anyone wishing to try to comprehend the origins of arguments used to justify slavery and segregation right up to the 1960s.
